

Some of the basic questions and answers when dealing with apps.

**Q: How do I install apps ?**

It is a good practice to check the apps' archive first.

A1: If it contains a folder named "apps", then you just need to drop it under  
[\STEAM\steamapps\common\assettocorsa\](#)

A2: If it contains a folder named as the app, then you need to drop it under  
[\STEAM\steamapps\common\assettocorsa\apps\python](#)

**Q: I've copied the app in the respective folder, but it's not showing ingame.**

A: Any app you install, must be first activated ingame: Options > General, and check the box next to the app.

**Q: I want to activate the app in Options, but it doesn't show in the list**

A: Check first instruction, you probably didn't copied the app in the right place.

**Q: I would like to get into app developing. Where should I start ?**

A: You can start by having a look at [Shared Mem Reference](#) , [Python Doc](#) and [THIS tutorial](#).
